Scout PIR – Software Release Rev 1.0.04. 7/27/23 10:09AM Checksum: 0xCBA6

New Features:

The Shot Limiter will now apply to wake-up signals to the camera box. This allows additional control when setting up sensors in potentially risky situations.

Bug Fixes:

Loading defaults through USB wouldn't perma-save the defaults to NVM. The user had to click "Save Config" after to save them.

The "Wake" signal is now sent regardless of the camera state to support LED lights without the camera box.

Added additional manufacturing tests.

Scout PIR – Software Release Rev 1.0.03. April 5, 2021 09:46:47 Checksum: 0x9B61

New Features:

The On/Off times have been increased to a maximum of 3600 seconds.

Bug Fix:

The sensor was incorrectly responding to the detected signal from other sensors.

Scout PIR – Software Release Rev 1.0.02. 06/07/2019, 9:33AM Checksum: 0xF788

New Features:

Significant improvement in the behavior of the sensitivity setting.

Scout PIR – Software Release Rev 1.0.01. 08/27/2018, 9:17AM Checksum: 0x1322

New Features:

Improved EOL functionality

Bug fixes:

Some computers would fail to redetect USB when the cable was re-attached.
